Factory fitted CNG kit

Italian CNG kit exclusively designed for New Alto backed by Suzuki's full warranty, keeps you more relaxed with complete peace of mind. It is also equipped with timing advance processor to ensure optimum engine performance.

Effective safety design based on the TECT concept

Suzuki's special expertise in small car engineering includes leading knowledge in effective safety design, such as our TECT concept, which was utilized in creating Alto's body. High-tensile-steel side impact beams on all doors heighten occupant protection by helping disperse side impact forces, without an excessive increase in vehicle weight.

TECT

Smooth-riding comfort. Functional and easy to use. Sharp looks. Offering maximum efficiency and powered by a 1.0-litre engine delivering peppy acceleration and responsive performance, the Alto fully responds to today's driving needs in a smart and stylish fashion. An exciting set of new features now make the Alto even more stylish, easier to use, more convenient and more comfortable.

Well-appointed, spacious cabin. Enjoy smooth driving all the way!

A wide front view. Easy operation.
The Alto's cockpit is built to offer a comfortable driving posture, a wide front view and easy operation. The instruments, neatly laid out around the new, easy-to-read white speedometer, include neat touches like digital twin trip meters and key-off, light-off reminder. New features on the dashboard include an easy-to-use dial-type A/C controller and a convenient pair of pull-out cup holders.

A bright, roomy cabin.

The Alto's well-appointed interior is now further enhanced with a new gearshift lever console and a new rear luggage shelf (VXR version). And thanks to efficient noise, harshness and vibration (NHV)-reducing body design and sound-insulating materials, rides in the Alto's bright, roomy cabin makes the driving smooth, comfortable and quiet.
