

Green Procurement

Pak Suzuki 's environmental activities are guided by the Suzuki Global Environment Charter.

Based on the concept of Environment Charter, Pak Suzuki is systematically promoting environmental protection activities throughout the entire organization and its all stake holders.

Pak Suzuki commit itself in promoting “production of small and subcompact vehicles” and “development of environmentally benign products” needed by customers based on the slogan, “Small Cars for a Big Future”, and make efforts to be “Smaller, Fewer, Lighter, Shorter, and Cleaner” on every side and works for the efficient, well-knit and healthy management.

We shall establish our compliance for law, regulation, and standard in order to implement the Pak Suzuki policies and shall construct trust relationship with customers, suppliers, shareholders, communities and our employees.

We have established “**Green Procurement Guideline**” to procure parts, materials and others with no/less environmental pollutant under this condition.

We would like to request all our suppliers to understand this condition and agree to our “Green Procurement Guideline”.

What is Green Procurement ?

Green procurement means purchasing parts or materials which are free from hazardous substances from the suppliers that are playing active roles in sustainability of the environment.

Vision of PSMCL regarding Green Procurement

Pak Suzuki is the first OEM among Pakistan’s automotive sector to promote environment friendly policy and execute the Green Procurement System. We ensure the compliance of Green Procurement by aggressively promoting and sharing the knowledge of environment contamination, restriction of materials and the means for the prevention of environmental pollution through decent communication with stakeholders.
